Kh. I. Yanes

Faraday Advisory Editor

J. E. Anderson
University of Minnesota

	Russian page	English page
A Mechanism for Generating Reaction Energy by the Interaction of a Plasma with a Moving Magnetic Field. G. G. Kapustyanenko	3	1
Ohm's Law for Partially Ionized Gases in Crossed Electric and Magnetic Fields at Large Diffusion Velocities. E. P. Vaulin and N. B. Starinskaya	9	5
Collision of a Gasmagnetic Shock Wave with a Flat Barrier in Infinitely Conducting Inert and Reactive Media. Yu. N. Denisov and V. V. Proshkin	15	9
Calculation of the Flow of a Dissociating Gas in an MHD Generator Channel. P. P. Kostenko and S. D. Frolov	20	12
Effect of the Length of a Nonconducting Barrier on the Characteristics of an MHD Generator. I. V. Lavrent'ev	27	17
Electrode Wall Boundary Layers and Their Effect on the Efficiency of Energy Conversion in MHD Channels. S. M. Apollonskii and Yu. P. Kos'kin	33	21
Interaction of the Boundary Layer over a Cold Electrode with the Core Flow in an MHD Generator. V. S. Yuferev	41	26
Calculation of the Internal Magnetic Field in One-Dimensional Magnetohydrodynamic Flow. A. I. Bertinov and D. A. But	48	31
An Experimental Investigation of Laminar MHD Flow of an Incompressible Fluid in a Diffuser. I. K. Kukin and O. S. Pankratov	57	37
Distribution of Flow Velocities in a Rectangular Pipe Situated with the Long Side of Its Cross Section in the Direction of a Magnetic Field. G. G. Branover, A. S. Vasil'ev, A. B. Tsinober, and A. Ya. Shkerstena	65	42
The Resistance of a Liquid Metal Flowing in a Magnetic Field. L. A. Vulis, T. A. Paramonova, and B. A. Fomenko	68	44

(Continued)

Single Issue: $40

Annual Subscription: $100

Contents (cont'd)

	Russian page	English page
Turbulent Plane-Parallel MHD Flow in a Transverse Magnetic Field. L. I. Skurin	75	49
The Electric Field in an MHD Channel of Rectangular Cross Section with Semi-Infinite Electrodes. M. M. Ignatenko	80	52
Magnetohydrodynamic Flow in Rectangular Channels with Forced Flow Through Porous Walls. V. M. Sych	85	55
Flow in an Inviscid Magnetic Boundary Layer. V. I. Tokatly	93	59
Effect of a Transverse Magnetic Field on the Velocity Profile in a Circular Pipe. M. Kh. Ibragimov, N. I. Loginov, and V. I. Subbotin	101	64
Oscillations of a Liquid Metal Cylinder Allowing for Magnetic Viscosity. Yu. A. Krikun, Yu. G. Kuksa, A. E. Mikel'son, V. A. Rezvitskii, and Z. D. Chernyi	105	67
The Convection of a Conducting Fluid in a Long Vertical Pipe with an Annular Cross Section. N. M. Pisarev	109	70
Electromagnetic Analysis of an Approximate Model of an Induction MHD Machine with Account for the Secondary Circuit. Ya. Ya. Valdmanis and Ya. Ya. Lielpeter	114	73
Optimization of Flat Induction Pumps with Allowance for the Thickness Effect and Hydraulic Losses. A. Ya. Vilnitis, E. V. Yubels, Ya. R. Shmit, G. Ya. Zvane, and Yu. P. Ushakov	123	79
Fringe Effect in Conduction MHD Machines when Part of the Current Branches Along the Channel. Yu. A. Birzvalk	129	83
Determination of the Dynamic Shunt Conductance of a DC Conduction Pump. Yu. A. Birzvalk and V. A. Teplyakov	138	89
Optimum Pole Length in the Magnetic Systems of Electromagnetic Flowmeters. V. B. Bol'shakov and L. M. Korsunskii	141	91
Theory of the Induction Method of Plasma Velocity Measurement. V. V. Proshkin	147	95
Calculation of the Electromagnetic Pressure in an Induction Valve. Z. N. Getselev and G. I. Martynov	150	97

of *Magnitnaya Gidrodinamika*

Volume 4, Number 2 · Summer 1968

Contents

	Russian page	English page
Experimental Study of the Interaction of an Argon Plasma Set in Motion Instantaneously with a Transverse Magnetic Field. Yu. I. Chutov	3	1
Longitudinal Stability of a Plasma Flow Between Two Conducting Plates in a Transverse Magnetic Field. G. G. Kapustyanenko	8	5
Calculation of Exothermic Waves that Ionize a Gas in a Magnetic Field. P. L. Gusika and G. S. Sukhov	13	8
Flow of an Ionized Gas Around a Cylinder with an Oscillating Surface. L. V. Selezova	19	13
Some Problems in the Study of a System of Electrogasdynamic Equations. Yu. S. Bortnikov and I. B. Rubashov	26	18
Flow in a Magnetohydraulic Trough. K. E. Dzhaugashtin	33	23
Experimental Study of the Magnetohydrodynamic Wake Behind a Circular Cylinder. Yu. B. Kolesnikov, A. B. Tsinober, and E. V. Shcherbinin	45	31
The Turbulent Wake in Magnetohydrodynamics. A. S. Pleshanov	49	34
On Transverse Velocity Disturbances in Magnetohydrodynamic Channel Flows. S. M. Apollonskii and Yu. P. Kos'kin	53	37
Linearized Analysis of a Prandtl-Meyer MHD Flow. A. S. Pleshanov and P. P. Lazarev	59	43
Nonstationary Flow in an Inviscid Magnetic Boundary Layer. V. I. Tokatly	65	47
Motion of a Conducting Fluid Under the Action of a Rotating Magnetic Field. A. B. Kapusta	71	51
Turbulent Submerged Jet of Conducting Fluid in a Longitudinal Magnetic Field. V. G. Lushchik	77	55
Magnetohydrodynamic Laminar Boundary Layer in an Axisymmetric Swirled Flow. Yu. E. Karyakin	82	58
Optimization of and MHD Generator in the Presence of a Constraint on the Duct Divergence Angle. A. I. El'kin	91	63

Contents (cont'd)

	Russian page	English page
Calculation of the Load Characteristics of an MHD Generator. A. M. Gorb, I. S. Gorobets, and N. I. Mazur	97	67
Compensation of End Effects at the Electrodes of MHD Power Converters. Yu. P. Emets	103	72
Electrical Characteristics of Linear Induction MHD Machines with Allowance for Fringe Effects. A. P. Rashchepkin	110	77
Optimization of the Efficiency of Electromagnetic Pumps. Yu. A. Birzvalk	119	83
Analysis of Optimization Data on Flat Linear Induction Pumps. Yu. A. Valuev	125	87
Choice of Optimal Relations in the Design of Liquid-Metal Induction Pumps. A. M. Andreev and V. A. Glukhikh	134	95
Effect of Nonuniform Velocity Profile on the Readings of an Induction Flowmeter. G. Kh. Kirshtein and V. E. Tsirkunov	141	100
Brief Communications		
MHD Flow in a Channel with Finite or Semi-Infinite Electrodes. V. E. Kozyrenko	144	103
Results of a Numerical Calculation of the Drag Coefficient of a Circular Cylinder in a Transverse Magnetic Field. Kh. E. Kalis, A. B. Tsinober, and A. G. Shtern	146	104
MHD Flow in Ducts with a Sudden Expansion. A. S. Vasil'ev	147	105
Operating Regimes of a MHD Channel. B. G. Karasev and I. V. Lavrent'ev	148	107
Nonsteady Motion of a Conducting Fluid due to Slow Rotation of a Disk in a Vessel in the Presence of an Axial Magnetic Field. L. P. Gorbachev and M. M. Grigor'ev	150	108
Motion of a Conducting Fluid due to the Rotation of a Disk in the Presence of a Strong Axial Magnetic Field. L. P. Gorbachev and E. P. Potanin	152	109
Transporting Pig Iron in an Electromagnetic Trough. L. A. Verte, V. E. Verkhovod, V. D. Dubrovskii, V. M. Zaitsev, V. A. Koshelev, N. M. Mishchenko, B. M. Rotmistrovskii, and A. G. Surmilov	154	111

	Russian page	English page
Construction of a Unique Semiempirical Theory of Turbulent Flow in Tubes in a Magnetic Field. G. G. Branover	3	1
Stabilization of Plane-Parallel Flow in a Transverse Magnetic Field (Experimental Results). G. G. Branover and Yu. M. Gel'fgat	9	4
Distribution of Shearing Stresses and Turbulent Exchange Coefficient for Liquid-Metal Flow in a Magnetic Field. M. Kh. Ibragimov and N. I. Loginov	14	7
Effect of a Magnetic Field on the Turbulence Characteristics of Liquid-Metal Flow. M. Kh. Ibragimov, N. I. Loginov, and V. I. Subbotin	19	10
Loss of Head in Liquid-Metal Flow Through Round Tubes with Conducting Walls in a Transverse Magnetic Field. L. A. Vulis, T. A. Paramonova, and Yu. K. Shmelev	23	13
Some Properties of an MHD Boundary Layer on a Plate. A. B. Tsinober and A. G. Shtern	34	22
Axisymmetric Magnetohydrodynamic Flow in a Vortex Chamber for Large Hartmann Numbers. O. A. Glazov	43	27
Plane MHD Jets with Variable Conductivity. E. I. Shilova and E. V. Shcherbinin	54	34
Structure of Fast MHD Shock Waves. O. I. Dementii and S. V. Dementii	59	37
Some New Electrohydrogasdynamic Phenomena Similar to Familiar Phenomena in Magnetohydrodynamics. A. A. Bal'chitis	64	41
Effect of an Electric Field on the Flow of a Dielectric Fluid in Tubes. V. S. Nagornyi	73	46
Stationary Three-Dimensional MHD Flow in Variable-Profile Channels with Plane of Symmetry. V. E. Kozyrenko	77	49

Contents (cont'd)

	Russian page	English page
Liquid-Metal Flow in an MHD Channel with Segmented Electrodes. I. M. Tolmach	85	54
An Investigation of an MHD Generator with Longitudinal and Transverse Loads. V. A. Pinchuk	91	58
Self-Excitation of MHD Generators with Liquid Metal as the Working Fluid. I. R. Kirillov	95	61
Approximate Calculation of a Turbulent Boundary Layer on an Insulating Wall of a Magnetogasdynamic Channel. L. I. Skurin	99	64
Laminar Axisymmetric Magnetohydrodynamic Flow in Curved Channels. V. M. Sych	107	69
Structure of the Magnetic Field in Electric Machines with Open Magnetic Circuit. I. P. Kvasnevskii, G. Kh. Kirshtein, and Ya. Ya. Lielpeter	116	74
Heat Balance of the Active Zone of a Conduction Pump in the Stopper Mode. V. M. Krauya	122	79
Optimization of Magnetic Field Topography in Conduction MHD Devices. G. K. Grinberg, Yu. K. Zander, and M. N. Kate	127	82
Design of DC Electromagnetic Pumps. B. G. Karasev and I. V. Lavrent'ev	133	86
Calculation of the Electric Field in Conduction Pumps for a Given Normal Derivative of the Electrode Potential. Ya. V. Briedis	139	91
Results of an Hydraulic Investigation of a Flat Electromagnetic Pump. G. A. Baranov, V. A. Glukhikh, and A. V. Tananaev	144	94
A Method of Reducing the Effect of Contact Resistance on the Readings of Liquid-Metal Electromagnetic Flowmeters. I. D. Vel't	149	98
Brief Communications		
An Analysis of the Fringe Effect in an MHD Channel with Semi-Infinite Electrodes for Finite Magnetic Reynolds Numbers. V. E. Kozyrenko and V. A. Teplyakov	153	100
The Symmetrical Problem of an Anisotropically Conducting Fluid. E. F. Tkalich and V. S. Tkalich	155	102
The Transition from Laminar to Turbulent Flow in Channels with Conducting Walls. V. V. Gnatyuk, T. A. Paramonova, and Yu. K. Shmelev	156	103

One-Dimensional Flow of a Magnetized Fluid. E. I. Yantovskii	3	1
Nonsteady Flow of Mercury Through a Trough in a Transverse Magnetic Field. M. B. Amitin, L. A. Vulis, A. L. Genkin, and L. A. Kudryashova	10	6
Resistance in the Flow of a Liquid Metal Through Channels in a Transverse Magnetic Field. L. A. Vulis, V. V. Gnatyuk, T. A. Paramonova, and B. A. Fomenko	19	12
Two-Dimensional Flow of an Anisotropic Conducting Incompressible Fluid in Axisymmetric Channels with a Longitudinal-Transverse Magnetic Field. S. A. Gorbatkov	29	21
Experimental Study of Turbulence Suppression by a Transverse Magnetic Field in Tubes of Special Configuration. G. G. Branover, A. S. Vasil'ev, and E. V. Shcherbinin	39	27
The Empirical Approximation of the Hydraulic-Résistance Coefficient in a Traveling Magnetic Field. L. M. Dronnik and I. M. Tolmach	44	30
Flow Past a Plate in the Presence of an Applied Magnetic Field. D. V. Sharikadze	53	36
Propagation of Axisymmetric Turbulent Jet of an Electrically Conductive Fluid in a Longitudinal Magnetic Field. K. E. Dzhaugashtin	56	38
A Jet of a Conductive Fluid at a Wall in a Transverse Magnetic Field. G. K. Ermolaeva and Yu. A. Sokovishin	59	40
The Distribution of Pulsation Energy in an Axisymmetric Turbulent Jet of an Electrically Conductive Fluid, Propagating in a Longitudinal Magnetic Field. K. E. Dzhaugashtin	64	43
Penetration of a Magnetic Field Through a Shock Wave. O. A. Sinkevich	71	48

Contents (cont'd)

	Russian page	English page
Laminar Flow of a Viscous Conducting Fluid Between Parallel Walls in a Traveling Magnetic Field. E. A. Tropp	75	51
Transport Coefficients for Nonuniform Systems in an Electromagnetic Field. U. I. Ivanov	83	56
The Conductivity of a Charged Plasma in a Magnetic Field. A. S. Pleshanov	93	64
Experimental Study of Single-Wave MHD Machines. A. M. Andreev, V. A. Glukhikh, and I. R. Kirillov	98	68
The Longitudinal Fringe Effect in the Primary Circuit of a Linear MHD Machine. A. M. Andreev	103	71
Calculation of the Field in the Winding Zone of Flat Linear-Induction MHD Machines with Allowance for the Finite Permeability of the Iron. B. L. Birger, A. Ya. Vilnitis, and V. S. Gorovits	109	75
Current Distribution in an MHD Channel with Continuous Electrodes of Finite Resistance. Yu. P. Kos'kin	113	78
Steady-State Mode of a Faraday Segmented MHD Generator for Nonnominal Plasma Input Parameters. Yu. A. Kazachkov	116	80
End Effects in a Magnetogasdynamic Channel with Finite Terminal Insulators. E. B. Benenson	119	82
Compression of a Magnetic Field by a Cylindrical Conducting Blanket of Fluid. N. I. Akatnov and A. P. Kuznetsov	124	85
Effectiveness of Using External Ferromagnetic Packets in Cylindrical "Coreless" Pumps. Yu. Krumin and A. Mikel'son	129	88
Vibration Treatment of Liquid Metals with Electromagnetic Forces. Z. D. Chernyi	133	91
Flow of a Conducting Fluid near a Nonconducting Sphere in the Presence of Crossed Electric and Magnetic Fields. V. A. Kinareevskii	137	94
Effect of Dissipative Processes in a Housing on the Stability of the Boundary of a Liquid Metal Confined in a Vacuum by a Variable Magnetic Field. V. F. Gubarev and Yu. P. Ladikov-Roev	143	98
Brief Communications		
Use of the Montardi Scheme with Segmented Electrodes for MHD Devices with an Isotropically Conducting Working Fluid. L. R. Starominskii and I. M. Tolmach	152	103
Results of Hydraulic Investigation of a Cylindrical Electromagnetic Pump. G. A. Baranov, V. A. Glukhikh, and A. V. Tananaev	153	104
